About Me

I'm an aspiring software engineer with expertise in web development, having hands-on experience with frontend technologies and UI/UX design. I also have experience with Backend / RESTful API Development. I have built applications and scripts where most are live and are being used to solve real world problems. I have also demonstrated my leadership skills through organisations and community initiatives to my whole university.

Education

Bachelor in Computer Science (Specialising in Software Engineering)

Multimedia University
Aug 2024 — Jul 2027 (expected) Cyberjaya, MY | CGPA: 3.98

Leadership Experience

Vice President of Goal Execution

IT Society MMU **Dec 2025 — Present**
Conducted interviews for recruiting committee for all divisions. Overseeing the Public Relations and Multimedia division, redistributed marketing duties between the two divisions fairly. Serving as advisor for CodeNecton 2026, an annual, nationwide hackathon for university students.

Head of Technical Division

CodeNecton **Mar 2025 — Nov 2025**
Conducted interviews to recruit members for the Technical division. Led the team in building the official CodeNecton website entirely using WordPress, with 9000+ visitors.

Assistant Head of Technical Division

IT Society MMU **Dec 2024 — Dec 2025**
Conducted interviews to recruit members for the Technical division. Led the team in building MMU Clubs Site, a clubs & societies aggregator website. Served as assistant director for MMU Hack Day, an internal hackathon for MMU students.

Volunteer Experience

Hackerspace MMU

Worked on adding responsive design on the main site, fixing visual bugs on mobile view, and fetching from internal API to dynamically display club data.

Workshop Speaker

Volunteered as speaker/trainer for a Tailwind CSS workshop to MMU students. Delivered a 2.5-hour workshop to 30 participants.

Workshop Facilitator

Volunteered as facilitator for:

- Git and GitHub Workshop
- Vim Workshop
- Cryptography and Web Exploitation Workshop

Technical Skills

Language	TypeScript · JavaScript · Python · Ruby · Java
Frontend	React · Next.js · Tailwind
Backend	Ruby On Rails · Express.js · FastAPI · Spring Boot (Basics)
Services	Heroku · Supabase · Vercel · Google Apps Script · Backblaze B2 · Docker (Basics)
Databases	PostgreSQL · MongoDB (Basics)

Projects

Hacktrack MMU - Internal Hackerspace MMU System

- A website where Hackerspace executives manage the details of members and store their IdeaTalks/ProgressTalks related to the projects that they worked on.
- Built a robust data migration pipeline that successfully preserved data integrity and accuracy between two distinct data sources.
- Designed and implemented a zero-touch member registration pipeline using Google Apps Script, eliminating manual data entry and creating a single source of truth across platforms.
- Tech: Ruby on Rails, Next.js, Google Apps Script
- Deployed on: Heroku, Vercel

ProPro - Project Proposal and Progress Tracking System

- A website where students submit their project proposals to supervisors, and supervisors may approve or reject the proposal, and record progress updates for approved projects. Used by 500+ students and lecturers.
- Revamped and redesigned the entire user interface for the site to a more clean and professional look.
- Add new features requested by users, implement bugfixes as reported by users.
- Tech: Ruby on Rails, JavaScript, Tailwind
- Deployed on: Heroku

MMU Clubs Site - MMU Clubs & Societies Aggregator

- A website where MMU students can browse and search for clubs in MMU, and club executives may update their club details and information for students to see.
- Lead the development for the club executive-facing interface. Distributed tasks to team members.
- Set up and configured authentication with Supabase Auth
- Tech: TypeScript, Express.js, Supabase, Backblaze B2, Docker
- Deployed on: Netlify, Render

Award

- Top 10 Finalist of UMHackathon 2025
- Top 25 Finalist of Programming League National 2025

Languages

- Native: English, Mandarin
- Conversational: Malay, Cantonese
